

## SMART SERVING THE NORTH BAY

Sonoma-Marín Area Rail Transit (SMART) is the Bay Area's newest passenger rail service providing a safe, reliable and congestion-free transportation option for Marin and Sonoma counties. The initial 43-mile system includes stations in the Sonoma County Airport area, Santa Rosa, Rohnert Park, Cotati, Petaluma, Novato and San Rafael. SMART's system also includes a bicycle and pedestrian pathway along the rail corridor. SMART's rail service includes a Larkspur extension, which is slated to open in 2018. Future extensions are planned for Windsor, Healdsburg and Cloverdale, completing the vision for a full 70-mile system.

### WELCOME ABOARD

SMART will use the Clipper Card system, for a smooth and seamless connection to other Bay Area public transit services. SMART fares are based on the distance traveled, with 50 percent discounts available for seniors, youth, and for passengers with disabilities. Clipper Cards are available at all SMART stations, or online at [www.ClipperCard.com](http://www.ClipperCard.com). Discounted Clipper Cards can be obtained at customer service centers, with proper verification.

Substantial commuter discounts are also available through SMART's annual Eco-Pass or through SMART's 31-Day Pass program. For more information on fares, visit our website at [www.SonomaMarinTrain.org](http://www.SonomaMarinTrain.org), call (707) 794-3330 or email us at [info@SonomaMarinTrain.org](mailto:info@SonomaMarinTrain.org).

SMART's initial passenger train service will include more than 30 trips each weekday, and limited weekend service. The weekend runs are designed to connect with the Larkspur Ferry.

SMART has onboard spaces for bicycles and bicycle parking at all of its stations. SMART also allows service animals on board, and is fully compliant with the Americans with Disabilities Act (ADA).

Safety is our top priority. Please be sure to stand clear of the platform edge at all times, and stand behind the yellow line prior to boarding. Board only in the designated areas on the platform.
